MODULE TRIALS

CONTENTS

This module has the following files:

- MODULE_TRIALS.docx
- MODULE_TRIALS_MEDIA.zip

INTRODUCTION

PT. XYZ decided to create simple CRUD system called **Kariawan**. This system will be used for employee data management. Your task is to implement the backend and frontend with Laravel PHP Framework. The detail description and tools that you can use will be described below.

The complete **Kariawan** system should cover the following requirement:

Menu	Detail
Login	- The system's role can be an Admin - The admin user can login (and logout) into the system on the start page of the application - After login, user can access Employee menu. Note: the system is not providing register menu, all user data registration is managed by administrator on the database directly
Employee	User can Show employee data (Name, Email, Phone Number, Address) User can Add employee data User can Update employee data User can Delete employee data

INSTRUCTIONS TO THE COMPETITOR

- Save your files in your root directory on the server called "**xx_module_server**"
- Create/generate a db-diagram named "db-diagram.xxx" (xxx is the extension/type of the file eg. pdf or jpg) and put it into the directory mentioned above. example:
